

## IZLID® Quick Draw

The IZLID Quickdraw pouch was designed to allow users quick and uninhibited access to either a IZLID 200P or a IZLID ULTRA. The pouch features a semi-rigid cup that maintains and controls the IZLID emitter body, and holds the device securely in place via a clamp which snaps around device's grip. Additionally, the device is tethered to the pouch via a Gear Keeper retractable lanyard that if released would ensure that the device is still attached to the user and would not be lost.

- Dimensions: 6.52" H x 2.00" L x 1.75" W

*Clamp snaps around grip to hold device securely in place*

*Gear keeper retractable lanyard tethers device to pouch*
